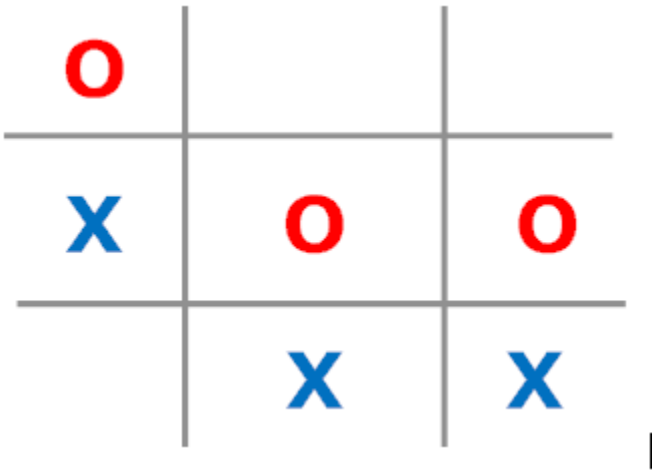
Logic Programming

Bonus

Due: Last Section.

Note: This task is individual task, The lab Instructor should evaluate a running program for it.

Using Visual Prolog develop a Tec-Tac-Toe game with two players such that, the first player is a user and the second player is the computer.



You are asked to submit two requirements:

1. A Tec-Tac-Toe running program.
2. A report includes the following:
   a. Introduction to your application.
   b. Description of the algorithm used to manipulate the computer as a player.
   c. A brief guide how to install and use your game supported by snapshots.
   d. A reference list includes all the resources you referred to in order to complete your game.
