

Programming for www

Assignment 4

Due: Next Section.

Notes: This assignment is individual assignment, every student should complete it by himself, and the lab Instructor should review it within the lab.

(10 points) The [timeanddate.com](http://www.timeanddate.com) web site provides useful information about different sites. This can be done by query a capital city name in the following URL (<http://www.timeanddate.com/worldclock/?query=cityName>), for example in the following page we query for Cairo

The screenshot shows the website's interface for Cairo, Egypt. It includes a navigation menu, a breadcrumb trail, and a main content area with a clock, a list of details, and a map.

Country:	Egypt
Lat/long:	30°03'N / 31°14'E
Currency:	Egyptian Pound (EGP)
Languages:	Arabic
Dial Codes:	+20 - See how to dial ▶

Based on the previous information, create a simple web page using PHP and HTML to query a user for a capital city name and retrieve the following information: (Location, Current data and time, Currency, Language, and current date and time). This page should look as following:

City Book

Country: Egypt

Lat/Long: 30°03'N / 31°14'E

Time: 13:04:47, Tuesday, 31 March 2015

Currency: Egyptian Pound (EGP)

Language: Arabic

Dial Codes: +20
